Scenario 1: Classical Artwork Category: Junior

You've been commissioned to digitally recreate a classical piece of art! Choose your favourite classical artwork and remake/enhance it using a digital method.

Scenario 2: Movie Ending Category: Junior

Not all our favourite movies end the way we wish they would. If you were to change the ending of any movie, which one would it be and how would you do this?

Scenario 3: Automated Art Category: Mixed

Many jobs in today's world can be automated, and we are starting to see robots used more and more in our daily lives. Could robots become artists? See if you can create a robot or program which can create art in an art medium of your choice!

Scenario 4: Dance Robot
Category: Mixed

You've been hired by a dance group to choreograph and demonstrate a dance for their upcoming performance! However, your dancing skills aren't quite up to scratch… Design a dance routine and use a digital or hardware/robotics method to perform it – make sure to add music as well!

Scenario 5: Toy Design
Category: Mixed

Create or 3D model and 3D print a toy which allows others to express themselves in any way.

Scenario 6: Mini-Music-Player Category: Senior

You want to find a way to play your favourite music wherever you want, but it's stored on your computer and you don't want to carry your heavy, bulky laptop with you everywhere. Unleash your programming, hardware and music skills, and use anything you can to design a mini music player!

Scenario 7: A Brilliant Idea Category: Senior

A paralyzed artist has had a brilliant idea for an artwork, but they can't draw it normally because of their condition. Design a program that will allow the artist to draw without using any of their body besides their head (eyes and mouth included).

Scenario 8: Open Scenario Category: Senior

Come up with your own scenario! It must be related to the theme of Express Yourself. If you have an idea, check with Mr Broadbent to get it approved before you start.
