

WHAT ARE SCENARIOS

Scenarios are basically what HakD is based around. You work with your team on a task of your choice and attempt to achieve the best possible prototype/result. It's also recommended that you choose what workshops you want to do based off the scenario you select.

Of course, having dry bland scenarios wouldn't be very fun now would it. So, I decided to spice them up a little...

Junior Category

SCENARIO 1: CHASE IS CHASED BY ALIENS

Chase is horribly paranoid is convinced that aliens are spying on him from across the universe. Why they would want to spy on him is beyond us, but, whether he is right or not, everyone deserves to have secure communication! Your task is to design an encryption system that keeps Chase and his communications safe from prying alien eyes and ears.

Junior Category

SCENARIO 2: FORGOTTEN PHYSICS

Aarush forgot to submit his rocket engineering project, and the deadline is tonight! He didn't sleep well last night and needs you to make it for him. You must make a working prototype of a rocket that can take off efficiently

Junior Category

SCENARIO 3: SPACE DEBRIS

Space debris is making it harder to protect satellites. Your challenge is to design a system that tracks space debris and alerts humans of close encounters

Senior Category

SCENARIO 4: ROBOTICS IS HOPELESS

The Dulwich Robotics Team has high hopes this year. Hopes so high, that they wanted to design a Venus exploration rover - but they are all sick! Now, it is up to you to develop a rover capable of surviving Venus' harsh conditions and collecting rock samples.

Senior Category

SCENARIO 5: PERSECUTING PARENTS

Ronan want a new space game, but his parents won't let him buy one. This makes Ronan sad.
Your job is to design and prototype a sci-fi game titled "To The Stars" that he can play

Senior Category

SCENARIO 6: CHASE IN SPACE

As well as being paranoid Chase has mazeophobia - the fear of getting lost but he is being sent on a mission into deep space. Help Chase feel better by developing a wireless positioning system for space missions.

Senior Category

SCENARIO 7: EDDIE THE ASTRONAUT

Eddie dreams of becoming a rocket scientist, and maybe even an astronaut, but he does not have access to state-of-the-art facilities . Your mission it to create a space exploration simulator to replicate astronaut training. Your simulation should teach Eddie what it takes to survive and navigate space!

Senior Category

SCENARIO 8: VR MARS

What will Mars look like in 100 years? What technology will have been developed? How will people thrive? Your task is to create a VR experience that simulates life on mars in 2125. Make use of big company names such as Aarush's Autobots, Coll's Convenience Stores, Savva's Savvy Styles and Mahek's Medicines.

Senior Category

SCENARIO 9: OPEN SCENARIO

Have a cool idea or scenario to pitch? Ask me, Chase, Aarush or Ms Kline for approval.
